### PharmLabs San Diego Certificate of Analysis

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC ISO/IEC 17025:2017 Certification L17-427-1 | Accreditation #85368

# Sample Cheesecake

| Sample ID SD230418-043 (72713)     |                       | Matrix Concentrate (Inhalable Cannabis Good) |  |  |  |  |
|------------------------------------|-----------------------|--|--|--|--|--|
| Tested for Extrax                  |                       |  |  |  |  |  |
| Sampled -                          | Received Apr 17, 2023 | Reported Apr 20, 2023                        |  |  |  |  |
| Analyses executed CANX, RES, MIBIO | G, MTO, PES, HME, FVI |  |  |  |  |  |

Laboratory note: The estimated concentration of the unknown peak in the sample is 5.48% | Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannobinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-) D8 concentration is estimated to be: 76.9%

## CANX - Cannabinoids Analysis

Analyzed Apr 20, 2023 | Instrument HPLC-VWD | Method The expanded Uncertainty of the Cannabinoid analysis is approximately **3**.806% at the 95% Confidence Level

| The expanded Uncertainty of the Cannabinoid analysis is approximately <b>3</b> .806% at the 95% Confidence Level | LOD   | LOO         | Result | Result |
